

## *A glance on RMN's 'Flex'ability*

# About **RMN**

RMN Infotech Pvt Ltd. is committed to assist customers worldwide with their unique needs by providing them with comprehensive, value-added solutions and professional, personal service.

We have end-to-end expertise and experience in managing the projects right through ideation to fructification. All engagements are undertaken as a partnership, working with the client to establish an understanding of the business needs and requirements and thereafter providing the best means to achieve them.

### Priority

- ✓ Results are important but interaction is more important
- ✓ Treat every user as you would the business owner

### Attitude

- ✓ If it is worth doing, it is worth doing right
- ✓ We don't like to say that "we could do anything", yes, we only do things that we could really do well

### Thought

- ✓ We don't solve technology problems, we solve business problems using technology
- ✓ Think of every issue in terms of the business impact

# Why RMN?

We understand that finding a technical resources is easy, but finding a truly committed, reliable, trust worthy and long-term relationship is very hard and that's where RMN comes in. Our prime goal as your "Technical Partner" is to leverage the value that our clients derive from their IT investment through the use of trusted technical expertise and unmatched customer service that combine to deliver a delightful experience for our clients.

## Customer Comes First

We value and respect all our Customers in a very special way. We provide solutions based on their needs and to perfectly suite their business objectives .We have stilled this into our culture so that we could serve all our customers well. We measure our employee performance not just by their contribution to the bottom line, but also by how satisfied their clients were. We strive to delight every single client we work with and excel at every project we work on.

## Execute the Expertise

We are totally against saying that "we could do anything", yes, we only do things that we could really do well. Latest technologies are being innovated every day and there is a very healthy competition amongst the business prominently in offshore outsourcing industry. We are very conscious of the quality we produce and hence would be the first to admit the truth on our ability to deliverance. We are pretty succinct and topical.

## Process Centric Approach

A detailed plan would be carried on engagement process, status reporting and escalation procedures, development methodology, testing methodology, deliverables and documentation, and acceptance criteria. The Software Development Lifecycle goes through the following stages: Inception, Elaboration, Construction and Transition. Different artifacts are generated at the end of each stage.

## Excellent Infrastructure

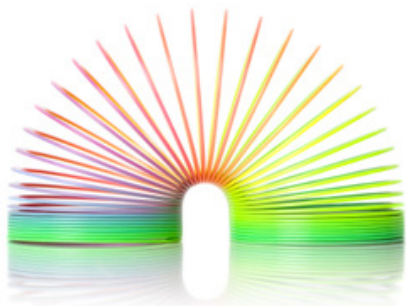

Our office in India operates round the clock and our USA based teams work during regular US business hours to make sure that all our offshore clients are well served. We present various communication options to our clients like IM, phone, email and video conferencing to keep in touch with the teams. Security is maintained strictly though access control cards and round the clock physical security check.

## Obsessed With Innovation

Innovation flows through our work culture. We build innovation into our products and services, helping you address your toughest IT challenges. Just like you, we shall constantly acclimatize to advancements in technology. But even as our markets evolve and expand, we remain committed and focused on improving the value that IT investments can bring to your organization.

## Passion For Technology

We want to make sure that we are not considered another technology company on this earth. Our recruitment procedure ensures that we hire only those who have a genuine passion for technology. We firmly believe that the most important thing that drives a person is doing what one likes to do.

## Strings of Our Flex Capabilities

# Flex Portfolio

Many businesses are now choosing Flex to get a state-of-the-art rich Internet applications built on the powerful Flex platform. RMN is expertise at providing all forms of Flex application development services and solutions. Our team of Flex developers has a wide experience in creating RIA solutions using the Flex technology.
